# QUALITY

---

Please rate the quality of the webinars offered.

4.54 average rating out of 5

Please rate the quality of the tools and resources offered.

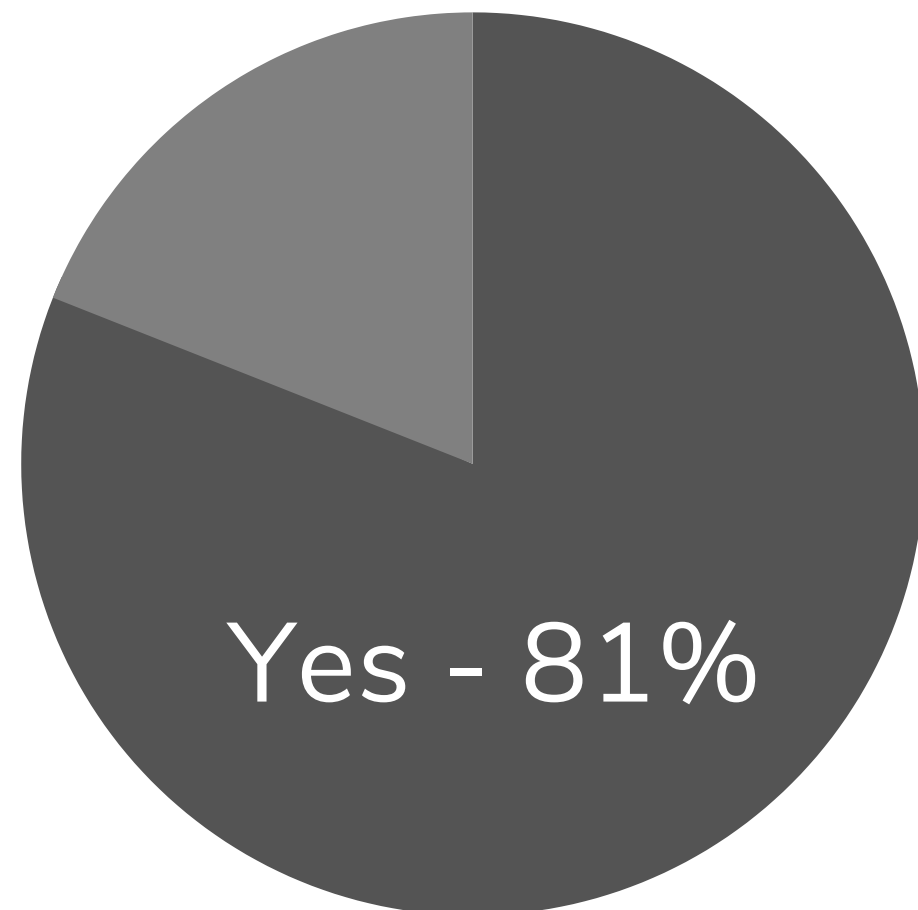

4.37 average rating out of 5

# MAKING IMPROVEMENTS

---

Have the SCN resources, webinars, or forums helped you to make improvements in your facility?

# PROCESS IMPROVEMENT TESTIMONIALS

Question: How have SCN  
resources helped improve  
care in your facility?

"Sparked ideas that I can implement in my facility. Appreciate the forums to promote discussion and resolution of questions."

"I started a Sepsis Champion program at my hospital."

"I like to be aware of best practices at other facilities. Not having to reinvent the wheel and being able to rely on our colleagues is priceless."

"Using resources to help guide our local sepsis committee; the information helps to clarify some of the issues and provides ideas on how to improve our care."

# PROCESS IMPROVEMENT TESTIMONIALS

Question: How have SCN resources helped improve care in your facility?

"Information learned has been shared with decision makers so improvements can be made in our facility."

"It's helped me understand the process better, and be more proactive about advocating for sepsis discharge education."

"Helped to validate what areas we struggle with and it is nice to hear what has worked at other facilities."

"I was new to the role and immediately had a place I could go to meet other coordinators and do a gap analysis of our program."

# NEEDS ASSESSMENT

Question: Which subjects  
would you like to see more  
tools and resources for?

"I would love to see a short movie that shows triage process, admission, treatment, ongoing family and patient education, and discharge plan with family engagement type video."

"Secondary effects of sepsis, including stroke/MI/PE"

"Support and assistance for research in neonatal sepsis"

"Mortality score formulas, general resources on collecting data, and how to measure overall performance. These are really some of the things anyone new to sepsis can not find anywhere. Also, EMR specific abstraction help."
